See the reverse side for details about the DNA for Property Kits

Cavalier County Sheriff's Office

Enclosed is your DNA Property kit.

This is a forensic application that can be applied to all types of property. The pouch includes a special adhesive with thousands of microscopic dots. Each microdot has a unique PIN which has been registered to your online account at ProtechDNA.com.

Once you open your pouch of DNA adhesive, you should be prepared to use it completely on your valuables. Important application instructions are located on the back of this guide.

Once you apply this adhesive to an item, you need to list the details of the item in the section "manage my property" on your home page at protechdna.com.

PROTECHDNA

This community is qualified to receive FREE DNA for Property kits (each a $40 value)

What is DNA for Property?

A special adhesive that can be swabbed on all types of property. The adhesive will dry invisible and permanent. Suspended in the adhesive are thousands of tiny microscopic dots. They are .05mm – smaller than the size of a grain of sand.

When I swab the DNA adhesive on my property how does the police department know its mine?

Each microdot is chemically etched with a PIN (Personal Identification Number). That PIN is registered to you in the law enforcement database.

How does the police know if my property has the DNA adhesive on it if its invisible?

All law enforcement have special scanning tools that will detect the DNA on your property. Once detected, a special police viewing device will allow them to view the PIN and determine it's true ownership.

- SWAB it – just dab the DNA on your valuables
- Store it – Enter a description of the item in the police database
- Get it back – if lost or stolen, police around the country will know its yours!

IARLE

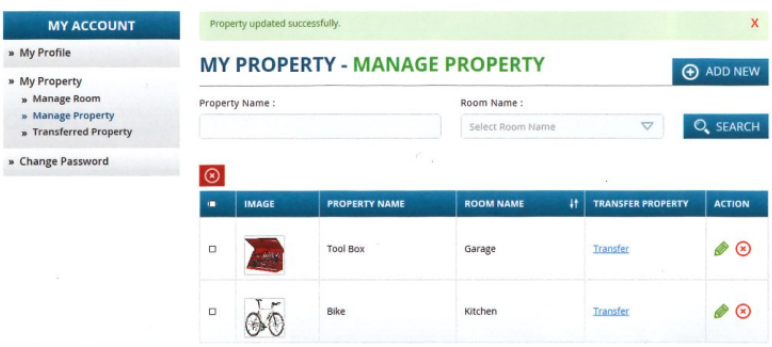
Your property pen also includes a FREE online account in the National Asset Registry for Law Enforcement – IARLE

Why do I need to enter a description of each item I mark with my property pen?

As the program is rolled out around the country law enforcement will scan all recovered property looking for your UV PIN that you write on your items. Some agencies might not yet know about the program or miss the PIN on your items. By entering your item into the database there is still a chance to identify ownership if the PIN is missed.

With your FREE online account in the IARLE database you have many features:

- Enter a full description of every item you apply your PIN (Personal Identification Number)
- Transfer item to a new user
- Manage all of your valuables
- Report stolen directly to police around the county Upload a picture of your item



Register this property pen to receive a FREE DNA property kit - $40 value

****shipping/processing may apply in specific parts of the nation.**

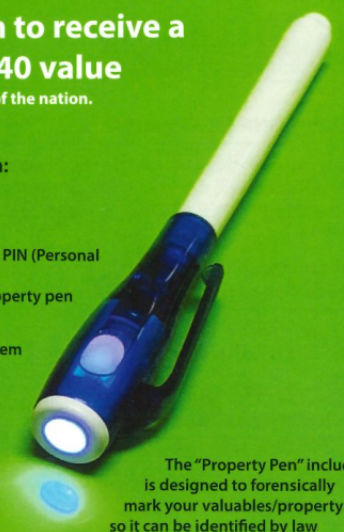
Here is how you register your property pen:

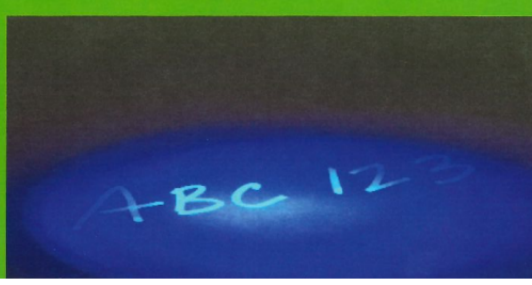
- Go to www.protechdna.com
- Click on register
- Complete the registration form
- Your confirmation will provide you with a unique PIN (Personal Identification Number)
- Apply that PIN to all your valuables with your property pen

When you register you set up a FREE account. Every item you apply your unique PIN – you need to enter that item in the database.

Law Enforcement around the country has access to the database, so when any item is recovered it can be tracked by to you as the owner.

By entering each item to which you have applied your PIN, you will increase the odds of recovery by 50X.



The "Property Pen" included is designed to forensically mark your valuables/property so it can be identified by law enforcement around the country.


The Property pen is equipped with a special cap that is a black light to view your PIN applied to your items.
